

This is the main sheet where I will post PSX games I've tested and will include in the Xtras. The other tabs are old and incomplete, although you may find the info you need to get a game running there if you look. No compatibility settings will be put on this page. Look at other tabs for that info. They're pretty disorganized and probably won't ever be cleaned up, but doing a CTRL-F for find should help you find what you're looking for. -Rx
